

ABSTRACT

In order to provide a display monitor, such as a thin design television or the like, in which its display unit is easily attachable and detachable from the stand structure and can be easily carried about, and where the place of installation of the display unit is not limited, a stand type thin design television includes a display unit (1), a joint body (15), a pillar (25) and a stand base (29). The joint body (15) is attached to the display unit (1) while the joint body (15) is free to be attached to and removed from the pillar (25) that is fixed to the stand base (29). In the first usage mode in which the pillar (25) and the stand base (29) are used, the joint (15) is inserted into the pillar (25). In the second usage mode in which the pillar (25) and the stand base (29) are not used, the joint body (15) itself is used as a stand.
